Education

National Chengchi University **2024 – 2026**
M.S. Money and Banking *GPA 4.21 / 4.3*

- Thesis: Forecasting FX spot Value-at-Risk using implied volatility, evidence from G7 currency pairs.

National Taiwan University **2020 – 2024**
B.A. Economics *GPA 3.6 / 4.3*

Experience

CTBC Bank **2025/07 – 2026/02**
Intern, Market Risk Management (MRMD), summer and semester terms *Taipei, Taiwan*

- Forecast Value-at-Risk for major FX pairs from option-implied volatility with quantile regression and machine learning; the project became the basis of my master's thesis.
- Designed dealer risk-management mechanisms for stablecoin business under the Basel SCO60 treatment of cryptoasset exposures.
- Compared stablecoin regimes (US GENIUS Act, Hong Kong Stablecoins Ordinance, EU MiCA): jurisdictional scope, issuer obligations for USDC and USDT, and the USDC de-peg during the SVB failure.
- Applied machine learning to market-risk analytics; trained in treasury structure, cross-border liquidity, and derivatives.

Gensler Research Institute **2025/02 – 2026/08**
Data Analyst, Cities Research *New York, United States (remote)*

- Built the City Design Index models (MGWR, PyGRF) linking 137 urban indicators to city satisfaction across 31 US cities; flagship study: Decoding the City (New York).
- Clustered census tracts into urban archetypes from 137 isochrone-based metrics, comparing seven algorithms across three methodological families.
- Built the City Satisfaction Score pipeline and interactive Leaflet and Plotly dashboards for stakeholder review; moved city-scale runs onto cloud virtual machines.
- Wrote the methodology paper in submission and public versions, and co-designed robustness checks that re-estimate results for income and education subgroups.

Hon Hai Precision (Foxconn) **2025/08 – 2025/09**
Summer Intern, Risk Management *New Taipei, Taiwan*

- Forecast FX rates around key macro events with the treasury's 5+1 framework.
- Reconciled trade records and analyzed internal ledgers to support AR/AP position management.

Chung-hua Institution for Economic Research (CIER) **2023/06 – 2023/12**
Project Assistant, First Division *Taipei, Taiwan*

- Analyzed China's macroeconomy for the First Division's research.
- Wrote for Trade Insight, the International Trade Administration's bi-weekly publication.
- Built an internal economic database.

Honors

CFA Research Challenge, Taiwan Final **2022/09 – 2023/05**
2nd Place, Best Written Report *CFA Society Taiwan*

Skills and certificates

Methods	Spatial statistics (MGWR, GWPCA, PyGRF), clustering, composite indices, Value at Risk, machine learning.
Tools	Python (primary), R, Stata, EViews, Power BI, LaTeX, Git, Docker, Asana, agentic LLM workflows.
Certificates	Futures Specialist; Securities Investment Trust and Consulting Professional; Senior Securities Specialist.
Languages	Traditional Chinese (native), English (proficient).
